CHeBA Annual Report 2014

Co-Directors Professor Perminder Sachdev and Professor Henry Brodaty are pleased to present the 2014 Annual Report for CHeBA. The Report clearly documents the excellent strides our youthful Centre has made in the two years since its inception. We look forward to continuing to deliver outcomes to fulfil our objective of healthy brains for healthy lives in the years to come.

Brain Ageing & the Role of Apolipoproteins

CHeBA researchers are investigating the role of apolipoproteins in brain ageing, thanks to the support of a \$40,000 philanthropic grant from the Sachdev Foundation.

CHeBA researcher Dr Julia Muenchhoff said studying these proteins is useful since they can play a role in both disease and successful ageing.
