

Gender Differences & Brain Ageing

New evidence has arisen from CHeBA's Memory & Ageing Study of a neural basis for the different behaviours in men and women and that the gender differences in brain networks continue through to old age. Lead investigator Alistair Perry said the study found stronger neural networks in elderly women around verbal and language areas of the brain.

Wipeout Dementia

Thank you to Ambassadors Richard Grellman AM and Wayne 'Rabbit' Bartholomew AM who were instrumental in making the 2015 Wipeout Dementia event an enormous success.

All funds raised by this campaign go to The Dementia Momentum and close this week. To donate to the cause [click here](#).

A Must Listen Interview

Spokesman for The Dementia Momentum Richard Grellman AM speaks candidly in this video interview about wife Suellen who has young onset Alzheimer's and lives at HammondCare's Waldegrave House. "People I'm talking to are seeing this as much more than a tragic human issue," he says. "There's a very deep economic issue here as well. It's going to cost the country, taxpayers, a lot of money in the next 20 or 30 years."

Dementia in the Workforce

In this insightful article Dr Nicola Gates touches on the significance of an ageing population and the workforce. "Most of us realise that as the

population ages, the prevalence of neurocognitive disorders, traditionally known as dementia will increase. Yet little thought has been given to the fact that these two inevitable trends will, just as inevitably, collide. Australia is far from ready to cope with dementia in the workforce."
