Aspirin Use Questioned in Landmark 5 Year Study

Until now, there have not been any studies evaluating the risks and benefits of low dose aspirin in healthy older adults. Here guest blogger Dr Stephanie Ward summarises the [ASpirin in Reducing Events in the Elderly, "ASPREE" study](#) - a large, randomised controlled trial designed to definitively answer this question.

Alzheimer's Disease International 2018 World Alzheimer Report

"After a dementia diagnosis, there should be this whole area of re-enablement. We should be helping people to live positively with dementia," says CHeBA's Co-Director Professor Henry Brodaty in the Alzheimer's Disease International 2018 World Alzheimer Report.

Dr Adith Mohan on Studio 10

Neuropsychiatrist and CHeBA Research Fellow Dr Adith Mohan featured on Studio 10 to talk about behavioural changes in people with dementia. "There is a need for carers to be supported through these difficult times and for the individual to be cared for in a person centred, empathic manner," says Dr Mohan. For resources please head to the [Dementia Australia](#) website.
